Notice of Allowance

This is the Notice of Allowance for application number 09/993,362 Zero Looseness Fastener for Linkage Assembly, filed on 11/16/2001. Claims 1, 2, 4, 5, 7-12, 22 and 26 are allowed.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

The applicant has argued that the combination of the Arff reference with the Chaban reference does not have the proper motivation because the fastener as taught by Arff does not hold rotatable links, the plates (33 and 45) are fastened or "unified" to each other and there is no reason to combine this fastener with the fastener of Chaban which allows the links (82, 88) to rotate. This argument is persuasive. Also, the Chaban reference does not teach a central bore which is has a diameter which extends more than halfway through the first link more and wherein the surface to surface contact in the first link is continuous. Chaban teaches a gap for lubricant at (136).

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
